**To the Purchaser:**

We hope you and your family or school enjoy the use of these programs. If you encounter any bugs or other problems, please write to us and describe the symptoms as precisely as possible (and the cure, if you know it). We welcome letters describing your experiences with the programs, offering suggestions for improvements or follow-ons, and telling which programs you liked best. We are also interested in procuring quality educational programs for use in our school.

All income from the sale of our programs goes into a fund to help defray costs of computer education and scholarships at our school. We hope, by charging reasonable prices, to avoid having our software given away. To this end, we require that each purchaser abide by the license agreement stated below.

**Peninsula School Software License Agreement**

Purchaser agrees not to provide these programs or revisions or extensions thereof or copies of same in any medium to any party who has not both signed a license agreement with Peninsula School and remitted the then-current fees to Peninsula School at the above address. This agreement specifically prohibits sale or other transfer of the PILOT interpreter either by itself or as a component of any other computer program.
