January 17, 1977

Gentlemen:

Mini Micro Mart is pleased to forward an assortment of catalogs and other material. Amongst the material you will find a small quantity of TVT II/III conversion mod information which has been compiled by Mini Micro Mart. Individual club members may obtain a copy of this for \$1 postpaid, or if ordered by a club in a bulk package of 10 or more, at 50¢ each. (This is to partially cover our printing and handling expense.)

This information package represents information gathered by many different people and forwarded to Mini Micro Mart. Some of this information has been reproduced elsewhere in computer club newsletters. It is an example of how useful information compiled and gathered by various hobbyists could be put to use to everyone's advantage. In this connection we are pleased to acknowledge with thanks the various clubs that are sending us their monthly newsletters. We see valuable information printed in many of these newsletters and many times would like to reproduce the material contained therein. If you publish a newsletter, we would very much like to be on your mailing list. We would also like to receive blanket permission to reproduce material from your club newsletter (except, of course, in cases of copyright material which you reproduce that you cannot grant reproduction rights to). We would very much like in the future to contribute to the hobbyist cause by reproducing this material and passing it on to people on our various mailing lists.

Incidentally, we would be pleased to place the editor of your newsletter and one other member of your club on our preferred mailing list. In addition, if a list of club members is supplied, we will place all those members on our regular mailing list.

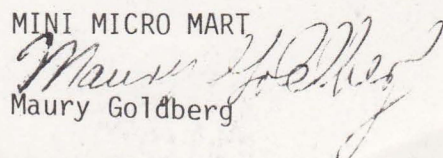

Also included in this package are schematics for various systems or boards that we have produced. These schematics were either preliminary, obsolete, or contained errors. Rather than throw them away, we are passing them on to your club to distribute to any member who is interested. (In general, they give a fairly accurate representation of a current MMM product.)

MMM will at any time be pleased to work with your club on a special group purchase plan, towards marketing a club developed product, or developing a specific product for which there is a widespread need.

We look forward to serving your club or individual club members during 1977.

Sincerely,

MINI MICRO MART

Maury Goldberg
