

LO*OP Center, Inc is an independent, non-profit, educational resource center. LO*OP's people discover, try out, and make available new concepts and materials for learning and teaching. We are especially interested in personalized, individualized learning experiences which make use of the latest technology such as computers, audio and video equipment, and the most advanced educational theory.

LO*OP's 1977-78 Projects are:

The Computer Awareness Project - to demystify the computer itself for children and adults and to explore common uses of computers in their community.

The Audio-Tutorial Learning Cafeteria - to make self-instructional mini-courses available to interested individuals.

The Structure of Intellect Program - to provide mental-abilities diagnostic testing systems to parents and schools and to demonstrate remediation techniques to teachers and parents.

Volunteer or Intern Positions are available to people with high interest in educational innovation and the ability to relate well to learners of all ages.

- 1: Aide in Computer Awareness - Applicants must be fluent in Basic Language programming and have an aptitude for explaining technology in everyday English.
- 2: Librarian for Audio-Tutorial Cafeteria - This person will check tapes in and out as well as sell workbooks and administer tests.
- 3: Structure of Intellect Test Grader - Applicants must have math aptitude and interest in educational testing.
- 4: Aide for Structure of Intellect Remediation Program - Applicant must be willing to learn the curriculum and enjoy working with both children and adults.
